

## Athletics

Athletics is a great sport that allows you to have lots of fun and interact with other people. Selection for the athletics competition took place in the summer through trials held on the school field. All key stage 2 children took part and the ones with the best scores represented the school at the Sackville School athletics track. There were four or five children per year group.

The events I did were the sprint and the long jump. They were scary but exciting at the same time. Athletics is one of my favourite sports. Taking part in the competition made me believe that I could do more of the events in the future.

Georgie Mackelden – Holly Class (Year 4)
